

## Materials for physical models in Anishinaabe Arcs

1. Cut pine boards, eg 1-in x 8-in x 6-ft. You can also buy blank wood plaques, around 7" X 9", eg here.
2. Wicker cane is the best choice; other types of reed tend to be too fragile. We recommend Chair Cane Medium 3mm 270 ft coil. Don't be confused by the wider binding strand that comes with it.
3. If you use a 3mm cane, your drill bit should be 1/8th diameter.
