

## Worksheet No 2: Checklist Laboratory Equipment

Instructor's Guidelines: To know what tools you will need to conduct successful experiments you need to know what is available. Laboratories always keep checklists of their equipment for this purpose. In this exercise, you will get to know the different supplies you need to conduct experiments with dyes.

You should always keep your workstation clean, so you have enough room to work. Once you have all your supplies, arrange them on the desk so you can easily find them and have them within reach, while at the same time placing them in a way that you don't bump into them or lose them.

# Worksheet No 3: Checklist Laboratory Equipment

Version for Mentors

Item	Photo	Description
Spatulas		
Pot		
1x Strainer		
3x Beakers		
1x Hot Plate		
1x Spoon		
1x Cutting Board		
Lab Coat per researcher		
1x Eye protection per student		
3x Gloves per student		
1x protective sheet		
petri dish		
measuring spoon		
measuring cup		
beaker
